

CFM Bespoke

# We supply the architectural, roofing & cladding and self-storage sectors of the construction industry with quality engineering

## CFM Bespoke

We pride ourselves on the quality of our products and offer a complete bespoke service to suit each architectural requirement. The quality of our finish is second to none and we are proud to have been specified on projects for many of the big market leading chains across various sectors i.e., educational, commercial, healthcare, agricultural, industrial and refurbishment etc.

Our range of fabrications includes several bespoke products and architectural features including rainscreen, louvres and rainwater management systems, which can significantly enhance the aesthetics, functionality, and overall performance of a building.

Manufactured by our highly skilled fabricators both standard and bespoke products are available in aluminium, galvanised, coated and mild steel. Either mill finish or powder coated by our in-house powder coating facility.

If you would like us to look at any drawings you require help with, please contact our sales team for further information.

All our fabrication work is CNC precision engineered and produced to suit any building application.

Our inhouse capabilities include:

- Laser cutting machine
- TRUMPF punch machine
- Bystronic press brake machines
- RAS folding machines
- Powder coating plant
- Welding bays
- Assembly bays
- Bonding bays
- Decoiling machine
- Guillotines
- Roll forming machine
- XYZ router machine
